

IHI CRAWLER CARRIER

IC30 • IC45 • IC70 • IC100

GENERAL PRODUCT INFORMATION

Heavy-duty lower track frame with sealed components are standard equipment. Oversized bearing have been used in the lower rollers and an abrasion resistant material has been applied to all surfaces of the upper rollers. Cross member technology strengthens dump bed stability and all tracks have been enhanced.

The IHI crawler carriers can be customized to fit any job application. Modifications include digger derricks, insulated and non insulated man lifts, front and rear winches, and liquid tanks/fire fighting apparatus.

The IHI crawler carriers have decreased the down time associated with maintenance. The lower track frame consists completely of sealed components. All access doors and engine cover are large and easily reached. Drive sprockets on the IC-45-IC-100 are segmented allowing change without track removal.

IC30 MODEL

- Maximum Payload of 6,600lb
- 2 Speed Manual Travel Hydrostatic Transmission
- Ground Pressure from 3.7PSI Empty to 8.7PSI Loaded
- 46 HP Kubota Diesel Engine
- Bed Capacity of 1.8cu. yds. (heaped)

IC45-2 MODEL

- Maximum Payload of 8,820lb
- 2 Speed Manual Travel Hydrostatic Transmission
- Ground Pressure from 3.0PSI Empty to 4.9PSI Loaded
- 99 HP Mitsubshi Diesel Engine
- Bed Capacity of 4.9cu yd (Heaped)
- Available with Fully Enclosed Heated & AC Cabin

IC70 MODEL

- Maximum Payload of 14,300lb
- 2 Speed Automatic Hydrostatic Transmission
- Ground Pressure from 2.4PSI Empty to 4.1PSI Loaded
- 224 HP Mitsubishi Diesel Engine
- Bed Capacity of 7.50cu yd (Heaped)
- Available with Fully Enclosed Heated & AC Cabin

IC100 MODEL

- Maximum Payload of 22,000lb
- 2 Speed Automatic Hydrostatic Transmission
- Ground Pressure from 3.3PSI Empty to 5.8PSI Loaded
- 249 HP Isuzu Diesel Engine
- Bed Capacity of 10.0cu yd (Heaped)
- Available with Fully Enclosed Heated & AC Cabin
