

VERSALIFT BUCKET

SST-40-EIH

PRODUCT DESCRIPTION

TIME created the concept and introduced the design of the Versalift SST-37/40 now copied by other aerial lift manufacturers. That same originality allows us to always be a step ahead of competitive machines with innovative features and proven reliability.

The unique and customizable design of the Versalift SST-37/40 ensures that you receive a quality-engineered product that meets your industry-specific needs. Each model can be further customized to include a variety of options that enhance the overall capabilities of the unit.

The Versalift SST-37/40 offers 27 ft 9 in of horizontal reach, up to 40 feet of vertical reach and 400 lbs of platform capacity, allowing you to reach higher and farther than ever before. The versatility of the SST-37/40 has made it the premier choice for the telecommunications industry, providing users with the greatest reach capacities available on the market today.
